Slow starting and a bit of a slog for the first 2 hours, but give it a chance. I'm enjoying it now. The combat and haggling system is simple and quick, the quests are not long winded, and the trading aspect isn't over complicated.... Which makes this an enjoyable "on the side game". But honestly, get through the 2 hour mark and you'll start to have fun.

Runs well on Windows 10.. **Pros**

- + **100% achievements takes only about 4 hours**
- + **No stress, very chill**
- + **Easy to start, but still challenging at times**
- + **Love the way it looks**
- + **Cheap**

Cons

- **When done with achievements, not much replay value for me**
- **Needs more challenges\achievements\content to stay interesting**

Verdict

7/10. Solid game for \$2. Could be better obviously but you get what you pay for.. i enjoy this mostly remind me more like sonic & kirby together 2D platform race to the finish with weapon power ups game of the year. 1/10]

This game is the worst game I have ever played in my entire life. There is next to nothing enjoyable about this game. It is supposed to be a platformer, but you can place platforms anywhere you want. Nothing is explained, be it goal or game mechanic. The models are poorly done and clipping is frequent. The registry of level completion is less than par. It is generally unpleasant and confusing. The music, which ranged from classical to borderline dubstep was not at all cohesive and didn't fit with the game. To top it off, the normal WASD move keys were changed to ZASD, with Z being move forward. And worse yet, the game needed to be closed to change it. Lastly, upon exiting the game, I had to go the task manager to end the exe, although I had already hit "quit game." I finished it in half an hour, and I will never open it again. All in all, atrocious.. Audience=

my pc could not run this with a gtx965 even thoe the graphics look there from a ps2 i was so looking forward to playing this but cant cos my frames are so bad. so if you have anything higher then a gtx965 dont bother buying it you will just end up refunding.. Buggy, broken mess. I could go on and on, but I'll give just two very clear examples:

1. There is no save feature

2. If you hit the escape button to pause the game, there is no way to restart the game. For reals. The only way out of the pause screen is to exit the whole damn game. At which point, see #1.

Worthless!!!. Good modelling, good texturing, good sounds, good dynamics. Highly recommended.. is a good game, but if the dev's made any paths to follow, i am gay. So much potential! Soundtrack similar to Dying Light! Machanics seems to be like Ark Survival Evolved but instead we got Zombie Survival. I just bought it after watching first Ep from Games4Kickz. It soo much better than other Early Access garbages.

Those bad reviews are just imbeciles who don't know how to play it. Or they didn't even waited over that first launch black screen.. I wasn't sure what to expect from Thirst tbh, but after seeing the screenshots and the 2.99 price tag i figured what the hell. Ding ding ding! Winner! Game is intense and visceral. Within seconds of loading it up I was hitting the deck and blasting choppers and dune buggies to hell.

Sound effects are gritty and loud and add to the excitement. Also, the dune buggies chasing the train fly over hills and ramps allowing for some pretty sweet mid-air machine gun kills.

My one complaint so far is the grenade grab\throw mechanic is buggy. Overall great game for the price and definitely added to the top of the roster for my next VR party.
